How do I fix architraves and skirting on steel framing?

Screw fixing may be required with some door jams. However most of the fixing of architraves and skirting, is generally done with great efficiency using nail guns that use hard nails instead of ordinary nails. Visit the [tools you'll need section](#) to find the right tools and supplies for the job.

How do you cut to length or make mitre joints?

The typical work of a second fix carpenter, such as cutting to length, and making mitre joints is pretty much the same as for any timber-framed house. By and large the only difference may be the type of vices used to make the connections
